Hiring a professional to prepare your plans/application is highly recommended.

## Application Project Data Table <br> New Home Construction

Items to make note of:

- Metric values are required within the Project Data Table. Imperial values are not required; however we recognize this is the standard on the job site.
- Floor area. Pay special attention to this section of the project data table.
- Round to two decimal places. We have had a number of issues recently Survey Plans during construction that do not match the approved plans and/or variance approvals (Surveyors typically round to two decimal places).
- The Zoning Bylaw regulations (maximums/minimums) are not required however we recognize this may be of value to you while working through the creative process and/or as your own check list for compliance. If you would prefer to denote these please do so in a table format; one column identifying the requirements and one for the proposed.

## Average Grade and Single Face Average Grade Calculation Sample

## Average Grade

$17.2+20.6+21.0+20.7+20.4+18.0+17.8=135.7$ divide by 7 grade points $=19.39$

Single Face Average Grade
$17.2+17.8=35.0$ divide by two grade points = $\mathbf{1 7 . 5}$
