

DISTRICT OF SAANICH PESTICIDE APPLICATION • NO FEE

Note: An application must meet one of the following requirements in order to be considered:

- a pest infestation that threatens the integrity of a sensitive ecosystem
- a pest infestation that poses a serious economic loss
- to control the spread of noxious weeds or invasive species

And all of the following:

- the use of the pesticide is permitted under the Integrated Pest Management Act
- the principles of Integrated Pest Management have been followed

Application Submission:

- Part 2 of Application Form (required) IPM Plan (required) sketch of property and relevant features (required)
- Photographs (optional) qualified professional report (if a sensitive ecosystem)

Case No:

Details of Proposal

Area of Proposed Pesticide Application (m² or ha): total area is 30 m2 (2 meters west of Tod Creek)

Name of Pest or Plant Targeted: Japanese Knotweed, Fallopia japonica

Name of pesticide to be used: Vantage Plus Max (glyphosate - 48% a.i.)

Name of pesticide applicator and certification number: Jeannie Westwood, Pesticide certificate # 39246

Accreditation of the pesticide applicator (if applicable): Landscape Horticulturist, B. C., Trades Certified

Briefly Describe Problem:

The highly invasive Japanese Knotweed has established itself and is spreading into the neighbor's sensitive woodland and creek. Three years of manual removal has been unsuccessful, and Saanich has required the owner to remove the knotweed under the noxious weeds bylaw #8080. Japanese knotweed is targeted under Saanich's Early Detection Rapid Response (EDRR) category of invasive species. The proposed pesticide treatment is a last resort.

Briefly Describe Proposal:

Knotweed will be treated with an herbicide using the "cut and fill" method for large stems (25% active ingredient), and a surface application (10% a.i.) will be painted on the thinner stems. Vantage Plus is the chosen pesticide, as it includes a surfactant to promote rapid uptake and prevent drift. The method has been proven 90% effective the first year (King County) and has no effect on the surrounding vegetation. It is also safe to use near water. Both methods will be monitored monthly until fall/winter dieback. Reapplication will be done during each monthly monitoring session if required. Retreatment may be required for at least two more years.

Describe how the requirements in sections 8-11 of the Pesticide Bylaw will be met:

Two 12"x17" plasticized signs will be posted in highly visible locations with the required information from the pesticide bylaw and IPM manual. They will be stapled to wooden stakes that are 3 meters from the property line at all of the major entry points to the treatment area. Signs will be posted July 25, 2011 and removed 72 hours after treatment. Neighbors will be notified in writing of the pesticide treatment (following pesticide bylaw Part 3 - Section 10) by July 24, 2020 and verbally notified on the day of treatment.

Proposed Date(s) for pesticide use:

July 27, 2020 (Alternate treatment date: August 4, 2020)
Possible Retreatment: August 27 2020, September 27 2020, October 27, 2020

Information Required for Submission

It is the responsibility of the applicant to consult with staff to determine the information required for a complete application. Processing begins only when an application is certified as complete. Additional information may be requested during application review.

Information		Details
Integrated Pest Management (IPM) Plan ▪ 3 copies	<input checked="" type="checkbox"/>	Author and credentials
	<input checked="" type="checkbox"/>	Description of Problem
	<input checked="" type="checkbox"/>	What other control methods have been used?
	<input checked="" type="checkbox"/>	How is the use of pesticides justified using the principles of IPM?
	<input checked="" type="checkbox"/>	Complete description of proposed solution.
	<input checked="" type="checkbox"/>	If serious economic loss is being claimed, please provide details of the cost if no pesticides are used, such as: replacement of vegetation; loss of maturity of vegetation; impact to the value of the property; the ecological goods and services provided by the effected vegetation; and the ability of the vegetation to recover without the on-going need for pesticides.
Sketch Plan: ▪ 3 copies metric scale only	<input checked="" type="checkbox"/>	Civic & legal address
	<input checked="" type="checkbox"/>	North arrow and scale
	<input checked="" type="checkbox"/>	Property lines, buildings, landmarks
	<input checked="" type="checkbox"/>	Area of pest problem
	<input checked="" type="checkbox"/>	Watercourses (on property or within 50m of property line)
Professional Report: ▪ 3 copies	<input type="checkbox"/>	Author and credentials
	<input type="checkbox"/>	Description of problem
	<input type="checkbox"/>	Verification of a sensitive ecosystem AND/OR Impact of noxious weed or invasive species
