

Big leaf Maple

Big Leaf Maple

- Has the largest leaf of any Maple tree in Canada.
- Small greenish-yellow flower, about 3mm across appear early in Spring, hanging in clusters at the ends of twigs.
- The bark is greyish-brown with shallow grooves.
- It is restricted to the South West corner of British Columbia at low to mid elevations.

Colquitz Creek Poem

The creek is swift
It has a little drift
You cannot hear that much sound
Except for a leaf dropping
on the ground.

More Trees

Western red cedar
Yellow cedar
Rocky mountain juniper
Lodgepole pine
And even more...
