

Please:

- Stay on the designated trails
- Keep pets on the trail and under control
- Pick up dog's droppings
- Carry out litter and use garbage cans
- Help protect your parks and trails

Fish are rare to be seen at the creek but they are the reason why the creek is still alive and well. The creek is beautiful because of the different types of plants, trees, insects and rocks. Keep insects around the creek to keep the salmon coming to get food.
