Q2 Tell us if anything is missing

Answered: 26 Skipped: 69

#	RESPONSES	DATE
1	I would like to see an explicit reference to the (regional) trail or greenway corridor through the park. It is a long standing proposal that encompasses this property. See 1998 Shelbourne LAP policies (including the 2007 amendment that specifically referenced this property and greenway), commitments in the 2003 Centennial Trails Plan, and the 2011 Bowker Creek Blueprint and associated greenways map.	1/15/2023 10:03 PM
2	Park needs to remain an open space for domestic animals to engage in play and exercise, while also supporting wildlife habitat	1/15/2023 10:32 AM
3	Question 1 follows an unwarranted assertion that the proposed Vision Statement is based on feedback heard during the community education process. As such, the question does not provide an adequate measure of the community's support, nor opportunity to participate in ensuring its intent is reflected in policies that will guide the future use of this property. The proposed Vision Statement does not reflect the community's intentions. In addition to providing rare urban habitat for birds, fish, and wildlife, the property is essential for carbon sequestration, water quality improvement, and flood abatement. Increasingly severe flooding in the Bowker Creek Watershed has demonstrated an urgent need for these services and the importance of restoration efforts that emphasize flood mitigation. To effectively reduce flood risks, a holistic Natural Flood Management approach including restoration of the creek as well as surrounding landscapes must be implemented. Specific measures consistent with these principles have been outlined in the Bowker Creek Watershed Management Plan. For example, the creation of wetlands, and native meadow floodplains. The vision statement implies that a restored Bowker Creek will run through a "park" with "open space" and "natural areas" for "stormwater management" as opposed to a functional floodplain that supports biodiversity and effective flood mitigation. As such, the statement is inconsistent with the Bowker Creek Watershed Plan and the community's needs.	1/14/2023 9:11 PM
4	I can't support this statement in full as it is too vague. There is currently an open space but this is not represented in the community vision. It should include restoration of the property, not just Bowker Creek. In addition to providing rare urban habitat for birds, fish, and urban wildlife, the property is essential for carbon sequestration, water quality improvement, and flood abatement. Increasingly severe flooding in the Bowker Creek Watershed has demonstrated an urgent need for these services and the importance of restoration efforts that emphasize flood mitigation. The open space will be occupied by meandering Bowker Creek into the space and with the creation of wetlands and ponds the excess water will slow down and have somewhere to go therefore reducing the communities risk of flooding. To really effectively do so means creating appropriate space for a flood plain, wetlands and ponds. Native plants are a critical component of flood mitigation . The deeper root systems of native plants increase the capacity of the soil to store water and have a higher absorption capacity than do traditional plantings. The creation of a meadow by removal of invasive grasses and replacing them with native plant species, will be an important aid in mitigating risks of flooding and increasing much needed biodiversity.	1/14/2023 5:27 PM
5	"connect with nature and with each other in passive recreation"	1/13/2023 4:23 PM
6	Not that I can tell	1/11/2023 6:51 AM
7	My edit of revised statement: The {park name possibly edited to " Kings Nature Park" or perhaps "Thaywun Nature Park"} supports biodiversity, restoration of Bowker Creek/THAYWUN to manage stormwater and to provide wildlife habitat in perpetuity, by preserving natural area open spaces for people to connect with nature and one another.	1/10/2023 1:18 PM
8	last sentence missing a work: ..."for people to come to connect with each other..."	1/10/2023 10:57 AM
9	Where to park users and recreation fit in the vision?	1/6/2023 6:50 PM
10	The traditional name for Bowker Creek, 'Thwayun' I believe	1/6/2023 10:37 AM

11	This version is quite good!	1/5/2023 6:13 PM
12	leave out the word "come" leave out "with each other" ... to connect with nature.	1/5/2023 5:02 PM
13	I would add 'accessibility'. Perhaps "....it is an accessible park held in perpetuity..."	1/5/2023 10:39 AM
14	No one appears to have mentioned the opportunity to have a small part of the park dedicated to having a community garden. There are so few allotments available in greater Victoria and the are a great way to promote community involvement as well as providing an opportunity to grow food locally. Even as a dog lover I'm pleased to see that there is no mention of them.	1/5/2023 9:51 AM
15	Explicit reference to "people and their pets" e.g. add dogs into the vision, since it's 90% dog owners that use the park now.	1/5/2023 9:23 AM
16	Can this park be designated 'Christmas Tree Park' ? A place where people can plant their potted Douglas Fir that they used as a Christmas Tree in early spring? Then that big empty space will eventually be filled with memories of christmases past..A new Victoria annual ritual? A way of offsetting carbon, too..planting 5 trees offsets 1 persons' bodily carbon..	1/5/2023 9:09 AM
17	This reduces "natural areas" to a component rather than essence of the park. We have school grounds, Allenby and Carnarvon that provide groomed spaces for playgrounds and sports. I'd like to see the vision statement capture this park as being about nature and a natural state.	1/1/2023 9:18 PM
18	Natural mushrooms that grow on the island to keep the trees and soil alive. Plus, it can feed the wildlife. Furthermore, can we make it a forest park?	12/27/2022 9:59 PM
19	I would strongly support this statement if it said "it is a park held in perpetuity for people and their pets to come connect with each other and with nature."	12/19/2022 5:01 PM
20	One of the main uses of the park over several years has been as an off leash dog park. I think it is important that that remain one of its main uses.	12/19/2022 10:55 AM
21	acknowledgement of pets	12/17/2022 5:18 PM
22	Thank you for including "in perpetuity".	12/17/2022 12:25 PM
23	Flower garden?	12/16/2022 8:12 PM
24	regional pedestrian and cycling connection	12/16/2022 1:00 PM
25	It is connected to the Jubilee Hospital and a network of sub-urban trails that connect oak bay, victoria and Saanich	12/16/2022 11:22 AM
26	I would rather not use the	12/15/2022 9:39 PM

Q12 Did we miss anything in the goals?

Answered: 27 Skipped: 68

#	RESPONSES	DATE
1	1) The goals are generally good but focus entirely on physical aspects. Would like to see some reference to community building. e.g., help create social ties, build community and local stewardship. 2) Also Goal 6 seems far too broad - should be more specific. 3) Where would a Community Garden fit re: current objectives? I think a small garden that includes local food production as well as developing planting stock for creek restoration at the park as well as upstream and downtream could be a good fit. Would be good to have an objective that could 'accomodate' this. 4) Re: dogs, perhaps a refernce to "responsible use"	1/15/2023 10:21 PM
2	It would be a real shame to lose the informal off-leash culture that is becoming more and more rare in the area	1/15/2023 10:06 AM
3	Yes: Re goal #3-As outlined in the Bowker Creek Blueprint,the SWMF process involves moving the creek into the natural area and the creation of wetlands and ponds; such measures must be implemented prior to restoration of the creek and natural areas. Thus, while I support the goal of restoring the creek, it is illogical to state this as the first goal. Goal#8- Activities that respect and protect the ecosystem such as walking, reading, and birdwatching are consistent with the community's intent and the current use of this naturespace. Importantly, the property is not a park and is not intended to host playground equipment, impervious surfaces, nor games that disrupt flora, fauna, and natural processes. Goal#9-It would be prudent for Saanich to explore and provide community education on the ecological and human health risks of off-leash dogs prior to enshrining a policy that allows it. Missing goal- Please include making the property accessible to hospital patients, staff and visitors as a goal. It is very important that the regional hospital has access to nature. There is extensive flooding along the current informal pathway to the hospital. That section of the Creek should be included in the flood mitigation plans and then restoration of that area and creation of an accessible path to the hospital can be safely created.	1/14/2023 9:18 PM
4	#11-it would be helpful for Saanich to provide some public education on risks of off leash dogs on ecological and human health	1/14/2023 5:31 PM
5	Restore Bowker creek to be accessible up close, not just for distant viewing.	1/11/2023 3:59 PM
6	Do not make a fenced area for off leash dogs. This is a nature space, not a dog park.	1/11/2023 7:00 AM
7	Dogs should always be on leash both to protect wildlife and to protect very young or older walkers	1/10/2023 5:07 PM
8	Goal 1 - Prioritize the health and resilience of Bowker Creek (or something like this which points to the creek as priority infrastructure in the space. This will then support SW mgmt, flood mitigation, ecology benefits, etc.	1/10/2023 3:07 PM
9	This captures the efforts of generations working to protect the space; thanks!	1/10/2023 2:04 PM
10	Per Q 11. my response as Support has this modifier implied: to balance wildlife habitat on land and into the creek that runs to the tideline, educate, add signage and recepticals for dog excrement at North and South access points to the Park - provide a separate receptical from the garbage bins, to capture feces and manage it Saanich-wide from Nature Parks throughout the region. Fecal matter entering marine ecosystems as well as creeks, is a profound impact. Create a new level of care for nature parks, that sets the bar higher, as in "nature parks are not dog feces free spaces to leave dog crap".	1/10/2023 1:27 PM
11	Sounds good	1/10/2023 10:59 AM
12	A definition of “informal recreation” would be nice	1/7/2023 5:50 PM
13	Leave as natural as possible to encourage natural growth. Minimize trails.	1/5/2023 5:04 PM
14	Do not disturb the natural area with human infrastructure. This park is beautiful because there is nothing in it: just the green space. Keep that.	1/5/2023 12:48 PM

15	Regards to the planting of trees: I support some more trees but want to make sure that a large open meadow remains	1/5/2023 12:37 PM
16	I don't see a small 9 hole disc golf layout in the plans...?	1/5/2023 11:00 AM
17	I would like to see the municipality develop a co-stewarding relationship with the host First Nations regarding Bowker Creek and this green space.	1/5/2023 9:57 AM
18	Don’t let dogs run. Keep a few good walking trails maintained, put in a couple of sitting benches at either end for people to rest at. Set a date for the annual tree plant where people can either plant their christmas tree or they can buy a native tree and plant it with a little paper sign that says ‘Smiths Family Christmas, 2022’ and then it becomes a spot to revisit for future generations.	1/5/2023 9:15 AM
19	Re: safe and accessible trail connections - that are appropriate to and conducive to maintaining a natural state park. "Safe" and "accessible" should not mean perfectly manicured. Re: accommodating dogs and their owners - again in a natural state, not via an enclosed "dog park" which entirely changes the experience for human and dog.	1/1/2023 9:29 PM
20	Control invasive species	12/31/2022 4:14 AM
21	Having lived near the park and used it for years in the past, I would say it is not suitable for off leash dogs. I think having dogs pass through with their owners on leash = good. Off leash park = no thank you. Is there a way a layer could be added about building community connections? A free little library, park bench or?	12/28/2022 7:11 AM
22	Can we make it a forest park with very few benches, I would come out and see it with educational plants from the island!	12/27/2022 10:06 PM
23	I do not support moving Bowker Creek from its current location by meandering it through the field.	12/26/2022 8:19 PM
24	In goal 6 - would park amenities be benches? or garbage cans? or restrooms?	12/19/2022 5:01 PM
25	How would dogs be accommodated while still preserving habitat?	12/17/2022 12:28 PM
26	Vehicle parking management Well-defined pathway entrances CPTED lens for safety and security	12/16/2022 1:04 PM
27	I would explicitly have a goal: Create a safe and protected space for wildlife. Otherwise good.	12/16/2022 10:45 AM

Q16 Additional Comments

Answered: 33 Skipped: 62

#	RESPONSES	DATE
1	#15 applies to this park only??	1/15/2023 2:16 PM
2	My support would depend on the size and accessibility of such areas	1/15/2023 10:08 AM
3	This property provides habitat for birds, fish, and other wildlife. There is significant potential for enhancements to dramatically increase the biodiversity and ecosystem services provided by this property which would include restoration of native plants and the creation of wetlands and ponds. I think it's important to not just look at one species but all the species involved here and what is the harm vs benefit.	1/14/2023 9:19 PM
4	Additional comments-This property provides habitat for birds, fish, and other wildlife. There is significant potential for enhancements to dramatically increase the biodiversity and ecosystem services provided by this property which would include restoration of native plants and the creation of wetlands and ponds. I think it's important to not just look at one species but all the species involved here and what is the harm vs benefit.	1/14/2023 5:49 PM
5	The goal is climate mitigation, wildlife habitat and urban forest generation; dogs to not take priority over these goals. Owners can keep dogs on leash.	1/11/2023 6:53 AM
6	Wildlife and climate is a priority	1/11/2023 6:49 AM
7	No off leash in this park	1/10/2023 3:08 PM
8	A fenced dog area would ruin the natural feel of the nature space. Require owners to have dogs on leashes.	1/10/2023 2:05 PM
9	Dogs and humans, sensitive topic. Balance the desire for completely off leash dogs by some, to provide some off leash, not all areas. Topic of fencing areas also sensitive topic: split rail fence in Cuthbert Holmes Park, Christmas Hill, provides some differentiating spaces, is not completely didactic. City of Victoria has added split rail fencing in sensitive ecosystem areas of parks, particularly off leash dog areas, such as in Alexander Park, designating dog areas within an urban park setting. I think fencing is required at Thaywun Nature Park.	1/10/2023 1:35 PM
10	I don't support changing access to the park trails for people as it is currently. However I do think its good to have leash rules for dogs, it's too open and people are not accountable for their dogs in many situations concept with no restrictions on dogs at all	1/10/2023 11:03 AM
11	If it’s a public space, it should be open to the public. Provide science-based facts outline why “sensitive habitat areas need protection from disturbance by people and dogs” and then define “disturbance”	1/7/2023 5:53 PM
12	I have small dogs that get scared when in enclosed off leash dig parks. We have loved the open spacetime let our dogs run. I have been frequenting the Hydro park for 20 years and would miss it if it became something other than a dog park. Non dog owners have their pick of places to go, and so few for dogs off leash. If it wasn't for dig walkers the Hydro park would be empty.	1/5/2023 10:53 PM
13	I feel dogs should be allowed off leash but under control.	1/5/2023 9:10 PM
14	Allow off leash access in the moderate and low sensitivity areas	1/5/2023 6:32 PM
15	Good plan! Hoping this park does not become and off leash dog park… please enforce with bi-laws that on leash, or off leash in fenced area only. I’ve seen at Oaklands playground, dogs are often off leash everywhere…	1/5/2023 6:23 PM
16	There are plenty of spaces elsewhere for dogs to run. Some places should be wildlife habitat and off limits.	1/5/2023 5:05 PM
17	Do not add anything to this park that would result in the removal of any mature trees.	1/5/2023 12:48 PM

18	Question 14 is poorly worded: if someone answers Do Not support, how will you know whether they don't want even leashed dogs there, or whether they don't think dogs should have to be leashed there? This invalidates the question and any data you get from it.	1/5/2023 12:41 PM
19	In regards to #15:please do not make the dog area small. There are few places in this area where dogs can run freely. Protect the sensitive areas but leave a large enclosed space for dogs as well as areas where people can relax in the natural spaces this park offers.	1/5/2023 12:40 PM
20	An off leash area is important and carries more value if it also has nature, trees etc rather than just another "dog park"	1/5/2023 12:11 PM
21	Areas immediately adjacent to bowker creek may require planted pacific willow/alder border to prevent people falling in and also protecting the nesting sites of animals that live near the creek.	1/5/2023 9:29 AM
22	Where is the reference to off-leash areas unfenced/unconstrained areas?	1/5/2023 9:26 AM
23	I strongly support creating dogs off leash areas, and ideally these areas would include more than just a flat grassy area. Dogs enjoy a variety of features, trees, walking paths, nature areas to explore in their recreation time, just as much as humans. If designating an off leash area for dogs, please consider the quality of the environment for the dog's enjoyment as well.	1/5/2023 9:19 AM
24	The answers above are ambiguous without an explanation. I do not see this urban nature space becoming the habitat for highly sensitive or rare species. We want this space to be suitably robust and home to native species that will thrive. New plantings need to be protected and Bowker Creek restoration work may need to be cordoned off for phases of work. We also may want to make a stretch of the creek more inaccessible by how it is restored. But I would not support larger stretches of zoned off or leash only parts of the park - it then becomes a managed park that tells humans and their dog companions to stay away. RE: dog run areas - I totally oppose them. I am in the park daily with my dog and that would end my use of the park. My dog does not like being in enclosed spaces with other dogs and nor do I. We are both there to walk. Nor would I want to promote this park as a "dog run" park. I want to continue to see is be a natural state park that humans and dogs get to enjoy respectfully.	1/1/2023 9:44 PM
25	See comments on previous page, should have known more dog questions to follow :)	12/28/2022 7:12 AM
26	I would really like to see educational forest material in the park from what things looked like with a few benches similar to elk/beaver lake!	12/27/2022 10:08 PM
27	I don't think there should be any highly or moderately sensitive areas. But if there have to be, they should be very small, and they should be fenced in. Regarding dogs, this park is one of the very few where dogs can run around in a large area with a variety of vegetation and even a small river. Don't take any of this away, please.	12/19/2022 5:03 PM
28	Question 14 and 15 are ambiguous, to say you do not support these options can mean you do notwant any dog access or that you thing off leash dogs should have full access.	12/19/2022 11:02 AM
29	Who decides what is a highly or moderated sensitive habitat?	12/18/2022 12:14 PM
30	allow dogs off-leash in open space area, fence off sensitive wildlife areas	12/17/2022 5:22 PM
31	Having a separate area for off-leash dogs could help protect sensitive habitat and reduce conflicts between dogs and other members of the public.	12/17/2022 12:30 PM
32	leave as is.... i am not aware that a survey has been done to declare any area of this space as "ecologically vulnerable or sensitive" that would exclude use by dogs and/or people.	12/16/2022 3:01 PM
33	No off-leash dogs. They are bad for dogs, people, and the environment.	12/16/2022 10:47 AM

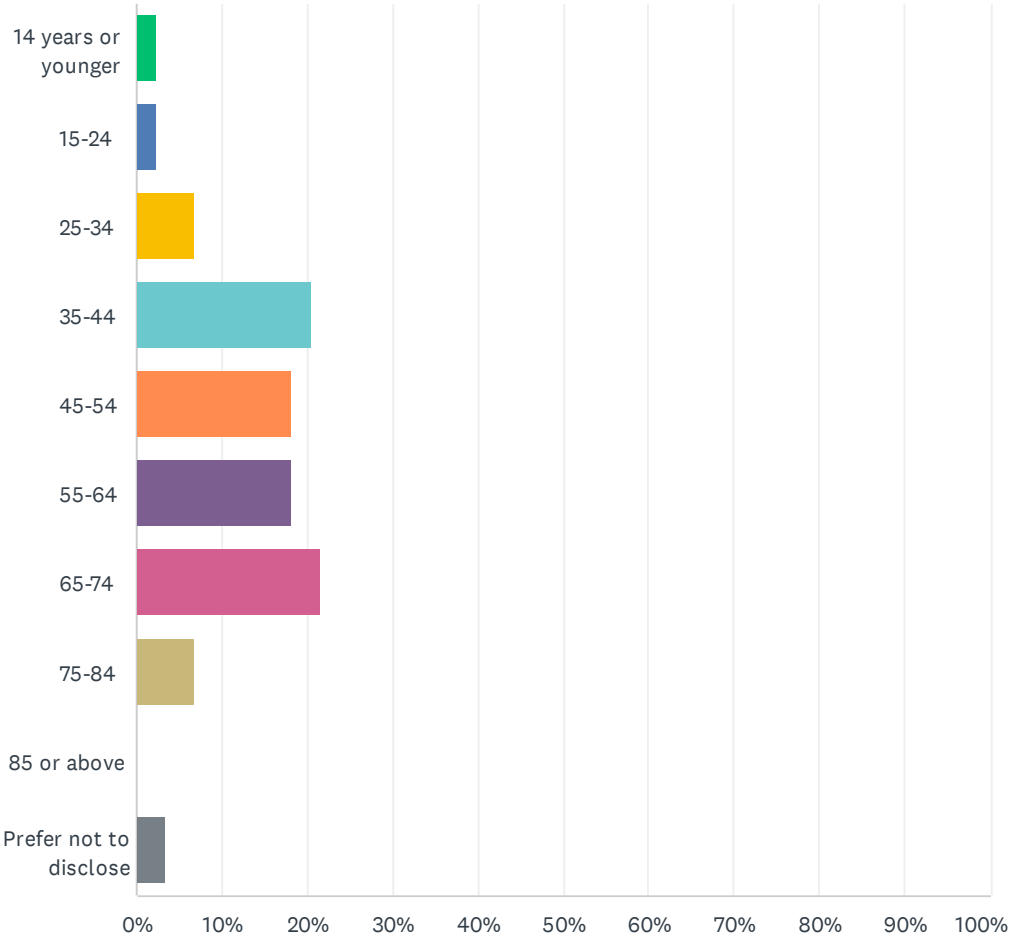
Q21 Please provide any additional comments on the management models. Is anything missing?

Answered: 14 Skipped: 81

#	RESPONSES	DATE
1	1) RE: Question 17. "Municipal Management Model (Saanich manages the park – no effort required by community)". In 2023, Saanich as parks manager should always be looking at ways to involve local residents and the community! 2) Saanich Parks should recognize that there could be a phased approach here whereby local stewardship capacity is recognized and built over time so that some functions can possibly be assumed by a stewardship/community group in the future. (3) What is also missing is a partnership model whereby community interests (perhaps facilitated by Saanich Parks or 3rd party and discusses roles/responsibilities. It need not be reduced to 2 parties.	1/15/2023 10:32 PM
2	I am very interested in the not for profit society model such as the Friends of Bowker Creek Society and perhaps a model such as Swan Lake Nature Sanctuary but feel it would be best to ease into that over time. For now a formation of "Friends of" or partial management model would be my preference.	1/14/2023 9:21 PM
3	I am very interested in the not for profit society model such as the Friends of Bowker Creek Society and perhaps a model such as Swan Lake Nature Sanctuary but feel it would be best to ease into that over time. For now a formation of "Friends of" or partial management model would be my preference.	1/14/2023 5:50 PM
4	The Options present the ideas to consider. Each point is relevant. Glad to see a range of Options for consideration!	1/10/2023 1:40 PM
5	Park needs consistent upkeep with mowing grass field in spring/summer, needs consistent bylaw regulations and rules. I think it's best managed by a municipality.	1/10/2023 11:04 AM
6	I don't know,enough about how these models would work in this particular space to comment.	1/5/2023 10:54 PM
7	Saanich Municipal is destroying urban forests, so limiting partnership with them in my view is desirable.	1/5/2023 12:50 PM
8	Our host First Nations' input and decision-making if they want it.	1/5/2023 9:58 AM
9	We need cross sections of residents not representation from any one group	1/5/2023 9:51 AM
10	The park is not really large enough to merit a ‘swan lake nature sanctuary’ model - but control of invasive species is definitely required on an ongoing basis. Using that flat area as a tree planting spot will eventually mean less maintenance required other than trail maintenance. Planting native berry bushes near the trail to prevent invasives setting up in the first place will help. A small, enclosed community garden might be appreciated by residents, with rentable/low cost garden plots to help with cost of invasive management? Just an idea..	1/5/2023 9:37 AM
11	I think making the community responsible for the park is unrealistic, placing too high a responsibility on volunteers, the need for constant fundraising, etc. I do think that having community involvement in park management is key to keep the park responsive to the needs of this community. A partnership model would help to ensure a greater responsiveness.	1/1/2023 9:49 PM
12	I would like to see everyone pitching in! Can I join too?	12/27/2022 10:09 PM
13	How easy would it be to switch from one model to another? Community involvement in a "Friends of" can change depending on the number of volunteers who are available.	12/17/2022 12:34 PM
14	leave as is.... saanich cut the grass.	12/16/2022 3:01 PM

Q22 What is your age?

Answered: 88 Skipped: 7



ANSWER CHOICES	RESPONSES	
14 years or younger	2.27%	2
15-24	2.27%	2
25-34	6.82%	6
35-44	20.45%	18
45-54	18.18%	16
55-64	18.18%	16
65-74	21.59%	19
75-84	6.82%	6
85 or above	0.00%	0
Prefer not to disclose	3.41%	3
